LIVE YOUR DREAM!

WE CREATE TOOLS TO MAKE THE DREAM OF ANY DANCER
CLOSER AND HIGH GOALS EASIER TO ACHIEVE.
DREAM – IS FREEDOM IN MOVEMENTS!

NIKOLAY™ is:

- CONSTRUCTION SHARPNESS for maximum comfort of every movement.
- MATERIALS and THE FORM of pointe shoes, as a professional tool to support the feet.
- CUSTOMIZED TOUCH to take care of the feet of each customer.
- It is a DREAM, which comes true!

Every NIKOLAY™ product is a tool to achieve goals, tested by professionals before the appearance on the shelf. We take into account the opinion of dancers, those who use our goods every day of their professional life. Every pair of dance shoes — is a combination of refined form with a wide assortment. It is a special approach, with concern about the health and future of every dancer.

Taking into consideration the variety of feet types, the dance styles, and the level of dancers, we have developed a simple system that helps to choose the proper shoes for any class, rehearsal or performance. We're sure that properly fitted shoes (incl. soft ballet and lyrical shoes) will guarantee the proper support, the self-confidence in the class or on the stage, and save the health of dancer.

It is our aim to give the tools which follow the shape of the foot which make the dream closer to turning into life. We're happy to know that hundreds of thousands of dancers are on the way to their success with NIKOLAY™ products.

POINTE SHOES

NIKOLAY™ pointe shoes are the most customized ballet shoes on the market. The number of basic variations (model, shank, size, width, hardness) exceeds 12500, and this number doesn't include the additional technologies, colors, and individual orders with different adjustments!

Often ballerinas use one certain model of pointe shoes with different shanks depending on the performances she will partake in. But, sometimes they require slight changes to basic model. To make this easier for our customers, we created a number of additional technologies. These are options that you can add to the basic pointe shoe models to create a pair that is bespoke to the customer's needs.

HOW TO CHOOSE

The dancer should first choose the last according to the foot shape and toe configuration. And next, go for the box, platform, vamp and other features.

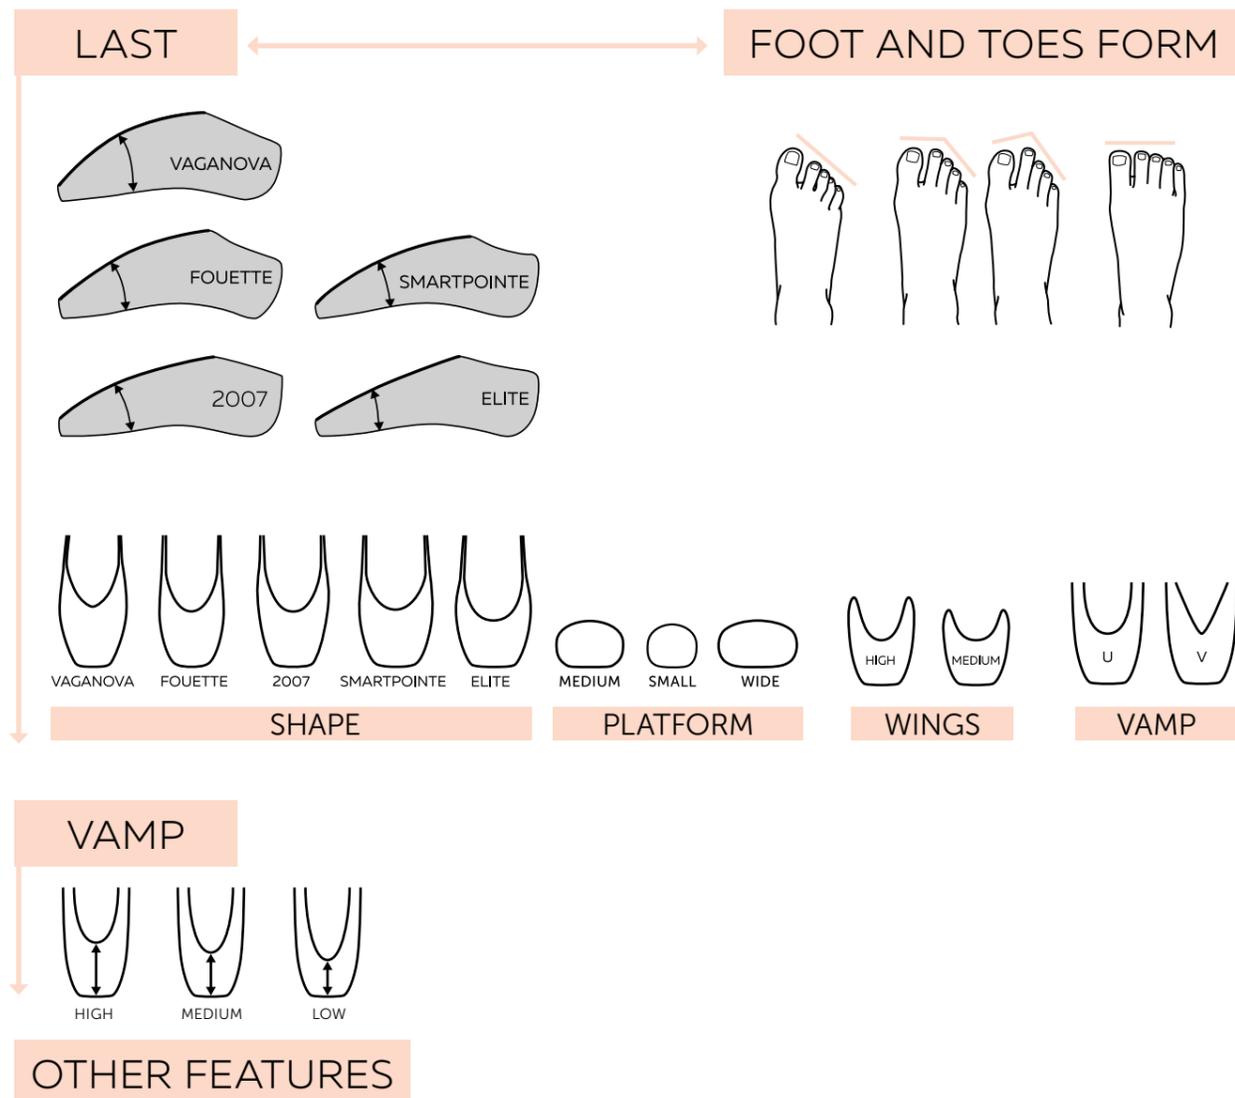

The last is the main attribute, which creates the inner form of pointe shoes. It is the base for proper support, health, and comfort.

NIKOLAY™ pointe shoes are the most customized in the world.

All our shoes are based on 5 different forms:

- 2007,
- Fouette,
- Smart Pointe,
- Elite,
- Vaganova.

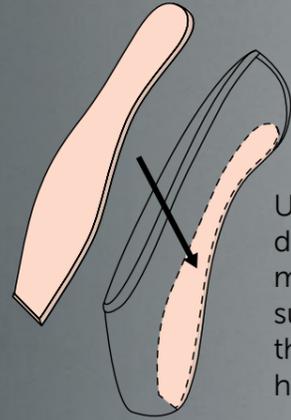

Each last is designed to suit a variety of foot shapes and toe configurations.

CLASSIC SHANK CONSTRUCTION

Unique fully hand-made production based on the natural materials. The differential support during lifespan keeps the foot well-trained and helps to prevent injuries.

CLASSIC, BUT DIFFERENT

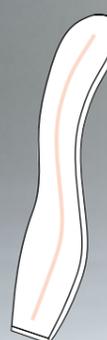

CLASSIC
Classic strong shank preferred by professionals. Good for advanced en-pointe elements.

EASY ROLL-UP
Easier roll-up from demi-pointe to en-pointe for those, who prefer flexibility in the fore part.
READY-TO-WEAR

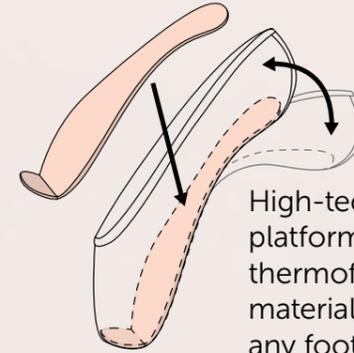

PRO
Silent shank: a bit softer compared to classic, but still supportive for advanced en-pointe elements.

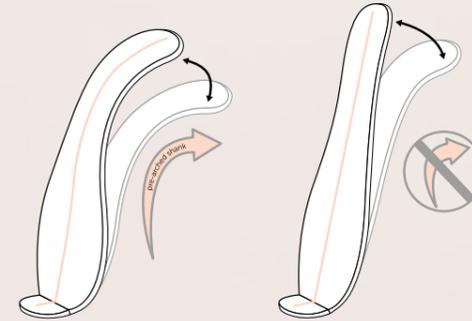

FLEX
Flexible shank, preferable for demi-pointe elements and contemporary in addition to classic en-pointe elements.
READY-TO-WEAR

INNOVATIVE SHANK CONSTRUCTION

Flexible and supportive shank at the same time suits for classic and contemporary technique.

High-tech cast-in insole and platform, made of non-toxic thermoformable lightweight material is adjustable to any foot arch and muscle strength.

Unique insole and platform construction using high tech materials provides longer life span.

READY-TO-WEAR

Do not hammer

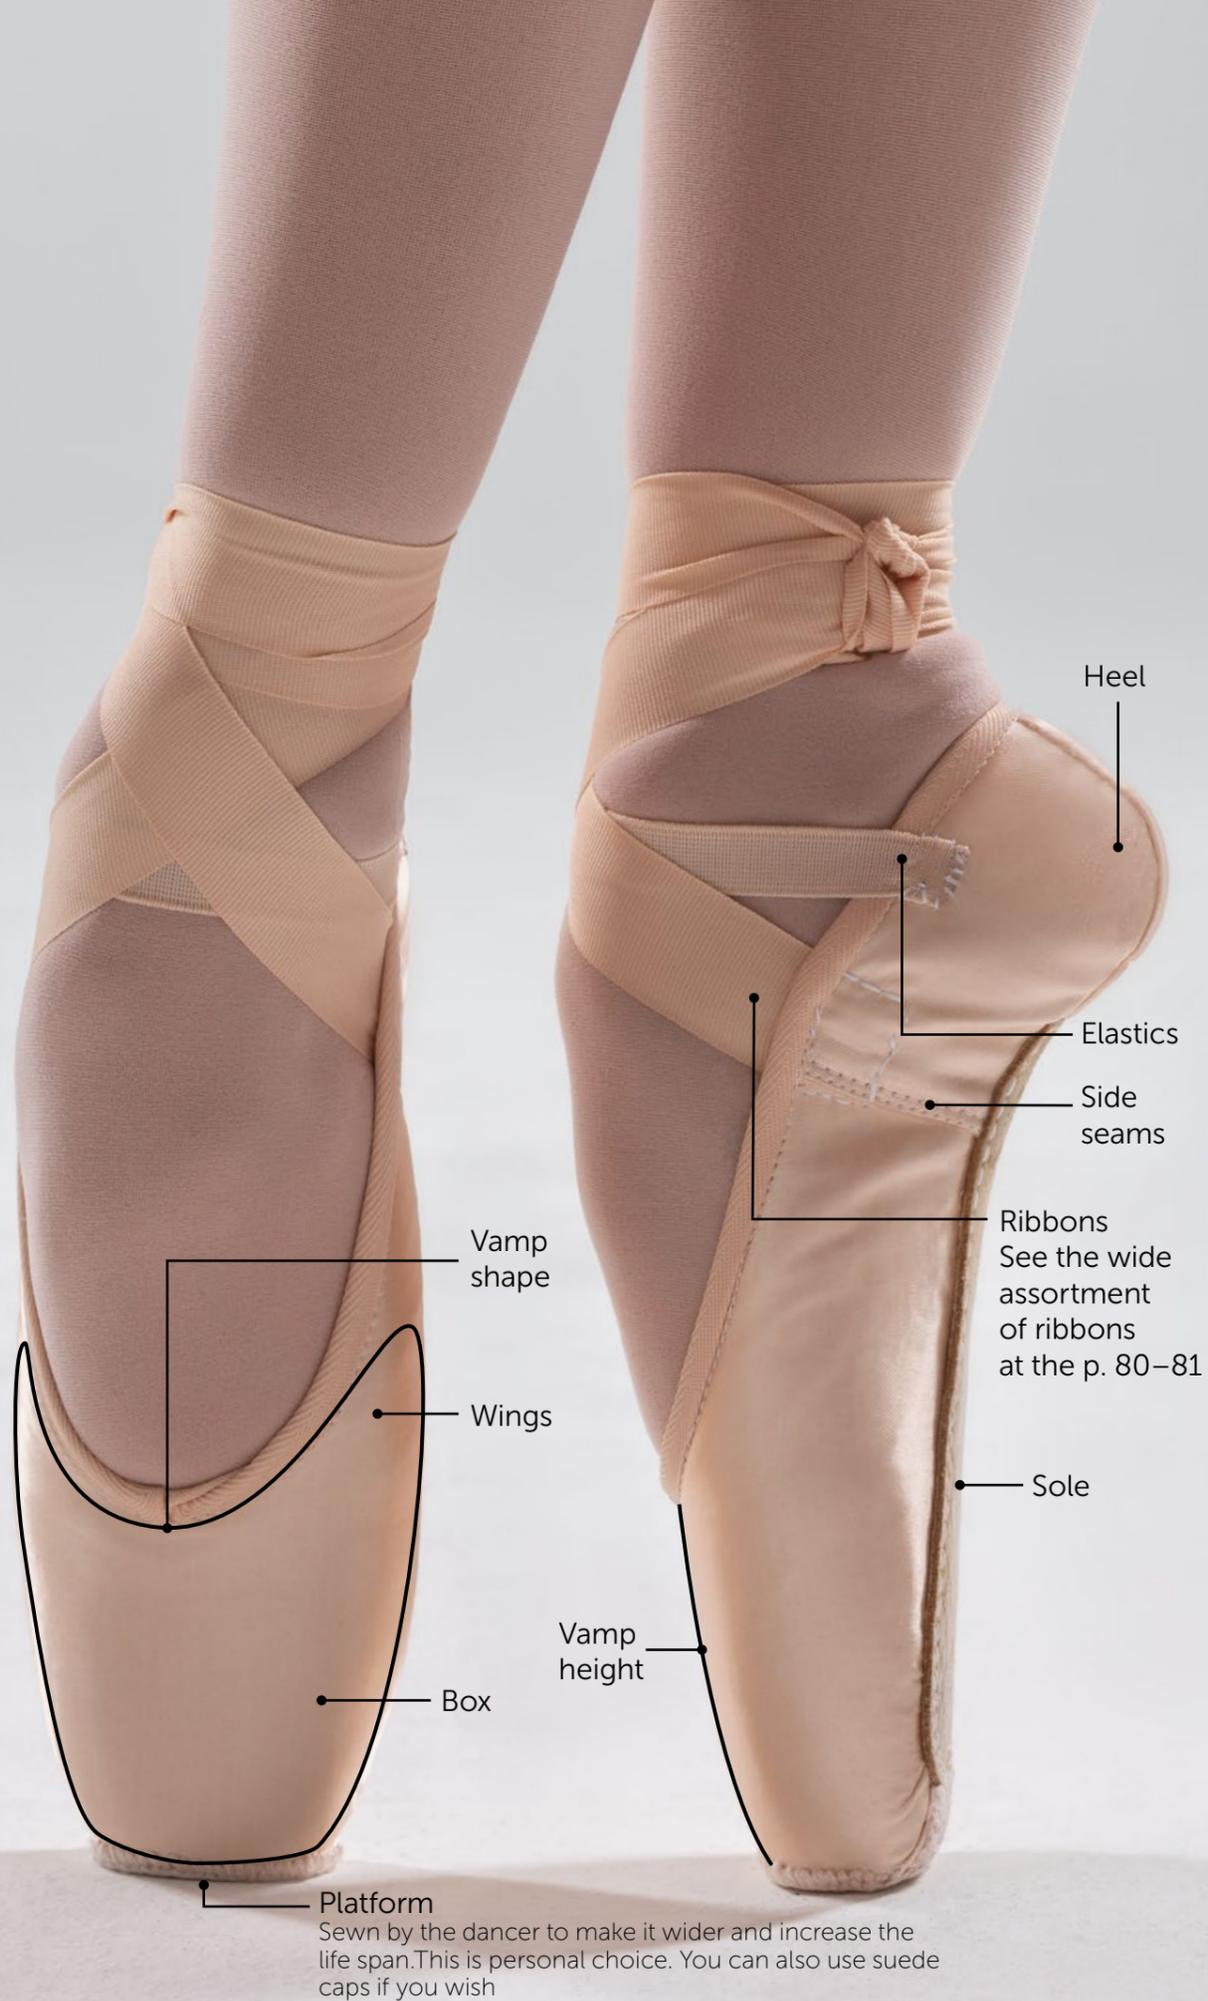

Soften the box with fingers

Do not break the shank

ATTENTION!
INNOVATIVE POINTE SHOE MODELS ARE READY-TO-WEAR. BREAKING IN THE SHANK WILL CAUSE DAMAGE OF THE SHOES.

TECHNOLOGY

PRO

SILENCE

Innovative damping compound of "Silent knot" technology eliminates the sound of pointe shoes on the stage.

- PRO in machine-stitched models (Maya I, Maya II, 3007, Nova): combination of "Silent knot" and silent insole. The insole additionally is made of sound absorbing material, which feels slightly softer compared to traditional version. We recommend to try a harder shank in PROs (e.g. SH instead of H).
- PRO in hand-stitched models (Fouette, Triumph, Elite): "Silent knot" technology with no changes to the shank.

FLEX

FLEXIBILITY

- Flexible shank feels like ready-to wear, as it adapts to the arch.
- Easier to bend the shank in fore part and under the heel.
- Additional comfort during roll-up to demi-pointe and en-pointe.
- Extremely suitable for demi-pointe elements and contemporary.
- Recommended for beginners, as they need more flexibility of the shank to train their foot. Flex shanks are often used as first pointe shoes after the demi-pointe. Please ensure you take into consideration the dancer's arch and strength.

PRO FLEX

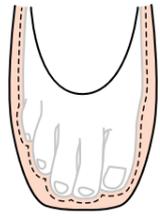

COMBINATION OF BOTH

For those, who prefer nothing, but the best we offer two technologies together: PRO to reduce the noise when dance and FLEX to make tiny movements comfortable and easy.

GLUE

CLASSIC GLUE

Classic glue is made of natural materials. The composition has adaptive characteristics. When ballerina put on the shoes, under the pressure in addition to the heat and sweat, the form of the shoe adapts to the form of foot.

TROPICANA GLUE

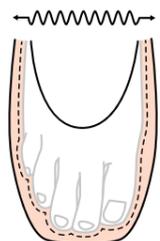

In the damp climate with high temperature, the situation changes: the classic glue during classes becomes too soft, and the lifespan of pointe shoes decreases. To help our customers in countries with such climate, we offer TROPICANA glue - it is still made of natural materials, but now it's more stable to water and temperature. We don't recommend ordering TROPICANA glue for the cold climate; as such glue can be felt like too hard.

NOTE
Option is FREE,
available at request,
with extended lead time.

MIRACLE GLUE

Innovative glue with memory effect, it adapts to the feet form but stays flexible and resilient during the dance. You can adapt the box form to your feet shape and profile with fingers.

MATERIALS

BRAND COLORED FABRIC

The satin color is exclusive and produced exclusively for Grishko ltd. It looks beautiful with different types of skin and doesn't reflect on the stage.

BOX

The box of all NIKOLAY™ pointe shoes is made of natural materials, that makes it breathable and safe for your skin. Jute, nettle, and cotton that are used for fabrics production, these natural materials work to keep the ballerinas' foot healthy.

OUT-SOLE

The outsole of all NIKOLAY™ pointe shoes is made of high quality natural leather which gives additional flexibility to the foot movements owing to the leather properties.

At the same time «VEGAN» option is available at request for all models, except hand-stitched.

PREPARA- TORY POINTE SHOES

Girls between the ages of 4–10 years wear soft ballet slippers to class. Generally, the transition to Pointe shoes is perceived to be painful for children.

The NIKOLAY™ Company specialists have developed a unique range of children's preparatory pointe shoes, which help children's feet to adapt gradually, step by step, without pain.

LIRYCAL / MODERN SHOES

Gymnastics and foot protection help the dancers and sportsmen to protect their feet during long rehearsals and create a perfect look at the performances. Choose the suitable shoes for different types of activities and be sure of excellent NIKOLAY™ quality.

MATERIALS AND PROPERTIES

The levity and artistry that the rhythmic gymnastics athletes usually show during their performance would not have been possible without particular attention to details. Such attention NIKOLAY™ has been ensuring for over three decades while creating shoes, apparel and accessories, based on the feedback constantly received from the professionals, so that the athletes have everything necessary to perform successfully and to the highest standard.

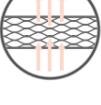

It is advised to choose the right shoes in accordance with the type of your activity so as to make sure they last longer.

MATERIALS AND PROPERTIES

GENUINE LEATHER

Used to make the sole and the upper of the shoe. Breathable material. Adapts to the foot shape.

MICROFIBER (artificial leather)

Provides sufficient floor grip. Allows the skin to breath. Long-lasting material.

CANVAS (100% cotton)

A breathable and hypo-allergenic type of natural fabric which can be easily dyed.

CALICO (100% cotton)

An extra thin type of fabric for proper fit.

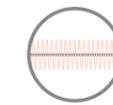

TERRY FABRIC (100% cotton)

Ensures dry skin and protects the foot.

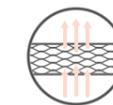

NON-SLIP SILICON

The shoes strings are covered with special non-slip silicon to ensure that the shoes fit perfectly even when performing complex movements.

FLAT SEAM

The sole and the upper are sewn together in such a way as to ensure that the seam is flat and even highly sensitive foot is guaranteed exceptional comfort.

ELASTIC YARN THREAD (Polyamide)

Special type of elastic yarn used for sewing ensures that the shoe perfectly matches the shape of the foot.

ELASTIC BINDING

Due to elastic binding the shoe securely hugs the foot and offers considerable comfort.

MINI SILICONE TOE PADS

Can be used on their own or in addition to any other pads above. Use one or two mini silicone pads to separate toes when needed, and remember they have different sizes that allow ballerina to combine them different ways. Strongly recommended if there is large space between toes

HOW TO FIND YOUR RIGHT SIZE

How to measure and identify NIKOLAY™ pointe shoe size:

- 1) Take a piece of A4 paper and put ballerinas' foot on it, draw the contour of the foot with a pencil; the pencil should be held under an angle of 90° (perpendicularly). Draw and measure the left and right foot, as they can differ.
- 2) Measure the distance from the heel to the endpoint of the toe (in mm);
- 3) Find the result of the measurements in the table. In case the measurement is between two sizes, we recommend taking a bigger one, as pads and tights also have a certain thickness.

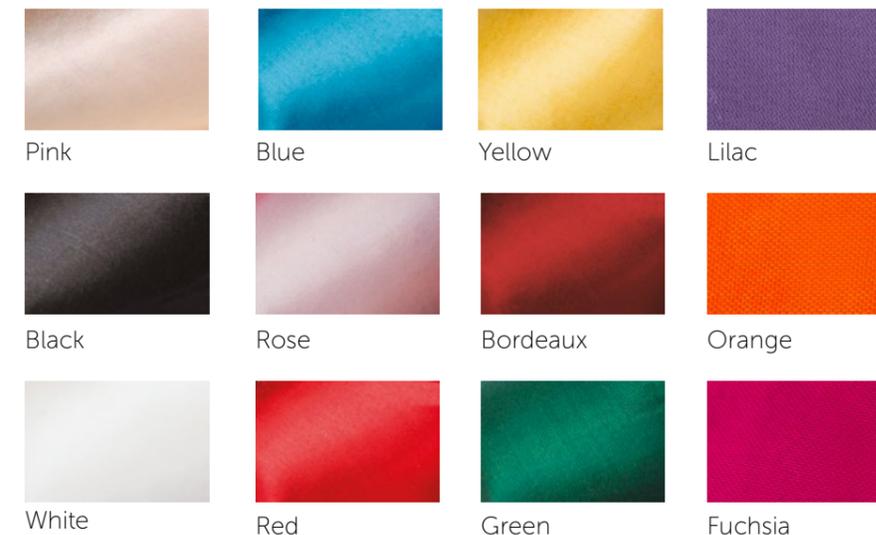

HOW TO CHOOSE THE WIDTH

NIKOLAY™ offers pointe shoes in 5 different widths:

- X – for narrow feet
- XX and XXX – for medium feet
- XXXX – for wide feet
- XXXXX – for super wide feet

Measure your foot at its widest place (where the bunions are) to identify the required width the pointe shoes. Relate the result to the table data and identify your width. It is recommended to choose a width that provides a firm and painless fit. If you notice wrinkles on the fabric and gaps between the shoe and the foot, it means you need less width.

POINTE SHOE COLOR CHART

FOR FEET WITH MEDIUM AND HIGH ARCH

Recommended styles:

MAYA I (PRO, PRO FLEX), MAYA II (PRO), ELITE (PRO), EXAM, 3007 (PRO, PRO FLEX), FOUETTE (PRO, PRO FLEX), TRIUMPH (PRO), SUPER TRIUMPH

ATTENTION:

Size chart is provided as a reference and an approximate guide only and does not guarantee an exact or perfect fit. The proper fit of pointe shoes depends on individual foot shape and toe pads used by dancer. The recommended way to determine correct pointe shoe size is to be fitted in local shop.
